A really key takeaway

Another scintillating title about this data you're going to show

This is a table that looks pretty.

| | Merged Columns | | Merged Columns | |
|------------|----------------|-----------|----------------|-----------|
| | Subtype A | Subtype B | Subtype C | Subtype D |
| Category 1 | 1 | 2 | 3 | 4 |
| | 5 | 6 | 7 | 8 |
| Category 1 | 1 | 2 | 3 | 4 |
| | 5 | 6 | 7 | 8 |

You might be able to make some *compelling remarks* about it.

Or you can highlight something here.

Hold onto your hats, this one has it all you could ever hope for.

You should never end a sentence with a preposition.

$$\frac{d}{dx} (\sin^{-1} x) = \frac{1}{\sqrt{1-x^2}}, \quad \text{for } x \neq \pm 1$$

***Wow, look at this cool arrangement
of block M's!***

Here's a good spot to connect
the pictures with the equation
above.

- ✓ Block M's are yellow.
- ✓ Block M's are bold.
- ✓ Block M's are in a sans serif font.

You might even have a footnote about all this stuff. Maybe a citation, who knows.
